Accounts receivable: Access switchboard → web app

Source: Access form **SwitchAR** ("Accounts receivable"). In the web app open **Accounts receivable** → **Reports**: pick a report card (like Management reports) and only the filters that report needs appear. The letters below are the codes Access prints next to each button. A PDF copy of this table is `AR_ACCESS_TO_WEB_MAP.pdf`.

Filters (letters on every Access button)

LETTER	ACCESS FILTER	WEB FILTER	API PARAMETER
A	Customer	Builder	`customerId`
B	Job	Job (after choosing a builder)	`jobId`
C	Lot	Lot (after choosing a job)	`lotId`
D	Phase	Phase (after choosing a job)	`phaseId`
E	From	From	`from`
F	To	To	`to`
G	Pack type	Pack type	`packTypeId`
H	Date	Date	`date`
I	Division	Division	`division`
J	Invoice	Invoice	`invoiceId`
K	Plan	Plan (after choosing a job)	`planId`
L	Burden	Burden (percent, e.g. 15)	`burden`
M	T&M #	T&M order	`tmId`

Only the filters a report uses are shown when you pick it.

Data entry forms (Access: 4)

ACCESS BUTTON	LETTERS	ACCESS OBJECT	WEB LOCATION	NOTES
Process billing	A H I	macro `ArProcessBilling`	Process billing tab	Lots come from a live query (Access copies them into a temp table first).
Process billing job	A B H I	macro `ArProcessBillingJob`	Process billing tab, choose a Job	Same lot rules as the macro; a "Packs paid (payroll)" column shows the payroll payment info the macro appends.
Manual invoice	–	form `ArInvoiceManual`	Invoices → Manual invoice	
Manual fix billing code	I J	`ArBillCodeFix` (manual form)	Fix billing code → Manual	Pick a division and invoice, then set stage/work per line.

Action buttons (Access: 3, plus the snapshot box)

ACCESS BUTTON	LETTERS	ACCESS OBJECT	WEB LOCATION	NOTES
Post billing	A H I	macro `ArPostBilling`	Post billing tab → Post billing	
Clear billing snapshot	A I	macro `ArClearBillingSnapshot`	Post billing tab → Clear billing snapshot	In-page confirmation.
Fix billing code	I	macro `ArBillCodeFix`	Fix billing code tab	Preview first (nothing saved), then confirm and run all steps in one transaction.
Customer snapshot in use (box)	–	`SwitchARsubBillProcess`	Shown on Process billing and Post billing	Warns when another user is billing the same builder and division.

Reports (Access: 18)

#	ACCESS BUTTON	LETTERS	ACCESS OBJECT	WHERE IN THE WEB APP (REPORTS PAGE CARD)	CHOOSE FIRST
1	Invoices by date/div	E F I	`ArInvoiceDateDiv`	Reports → Invoices → Invoices by date / division (opens the Invoices tab)	–
2	Inv summary by date/div	E F I	`ArInvoiceDateDivSumm`	Reports → Invoices → Invoice summary by date / division (opens Invoice totals)	–
3	Invoice	J	`ArInvoice`	Reports → Invoices → Invoice (opens Invoices; pick an invoice, then Print)	Invoice
4	Pre billing detail	A I	`ArTempBillDetail`	Reports → Pre-billing → Pre billing detail	Division
5	Pre billing summary	A I	`ArTempBillSumm`	Reports → Pre-billing → Pre billing summary	Division
6	Lot-pack to bill	A E F I	`ArLotPackToBill` (+ payroll pop-ups)	Reports → To bill and billing by lot → Lot-pack to bill	Division, From, To
7	Lot-pack by type to bill	A E F G I	`ArLotPackTypeToBill`	Reports → To bill and billing by lot → Lot-pack by type to bill	Division, From, To, Pack type
8	Lots by plan	A B K	`ArLotsByPlan`	Reports → To bill and billing by lot → Lots by plan	Job, Plan
9	Billing by super	H I	`ArBillingBySuper`	Reports → To bill and billing by lot → Billing by super	Date, Division
10	Total billing by lot	A B C	`ArLotBilling`	Reports → To bill and billing by lot → Total billing by lot	Lot
11	T&M (beside Total billing by lot)	A B C	`ArLotBillingTM#`	Reports → To bill and billing by lot → Total billing by lot (T&M)	Lot
12	W I P	A I L	`ArWip`	Reports → Work in progress → WIP	Division
13	Exp	A I L	`extArWip` (export of `rptArWip07WipExport`)	Reports → Work in progress → WIP export (on screen + CSV)	Division
14	W I P timed	A E F I (+ L)	`ArWipTimed`	Reports → Work in progress → WIP timed	Division, From, To
15	W I P lot	A B C L	`ArWipLot`	Reports → Work in progress → WIP lot	Lot
16	W I P T&M	A B M	`ArWipTM`	Reports → Work in progress → WIP T&M	T&M order
17	W I P job w/TM ID	A B I L	`ArWipTMJob`	Reports → Work in progress → WIP job w/TM ID	Division, Job
18	Sequence sheet billing data	A B D	`ArCmSequenceSheet`	Reports → Other → Sequence sheet billing data	Phase

Known differences from Access (deliberate)

- **Burden (L)** is a percent number in the web (15 means 15%); Access stores a fraction. W I P timed also takes Burden, because the Access query prompts for it.
- **Division by zero:** ratios show blank instead of a `#Div/0` error.
- **Fix billing code:** only lines with exactly one matching stage/work are fixed automatically; ambiguous lines are listed for the Manual fix (Access picks one arbitrarily).
- **Snapshot warning:** shown only when another user holds the snapshot.
- **Pop-up reports** (payroll detail/total under Lot-pack to bill) open inline under the row instead of a second window.
- **Lots without a plan** still appear in the lot reports (Access hides them with an inner join). The local data has none.
- Reports are checked against direct SQL on the sample database. The sample database has few rows for some reports (e.g. pre-billing snapshot, Fix billing code), so those show little or no data until real data is loaded.
