Accounts receivable: Access switchboard to web app

Access form SwitchAR → web app Accounts receivable. Prepared November 11, 2026.

In the web app, open **Accounts receivable → Reports**. Pick a report card (like Management reports); only the filters that report needs appear. The letters below are the codes Access prints next to each button: they show which filters the button uses.

Filters (letters A–M)

LETTER	ACCESS FILTER	WEB FILTER	API PARAMETER
A	Customer	Builder	customerId
B	Job	Job (after choosing a builder)	jobId
C	Lot	Lot (after choosing a job)	lotId
D	Phase	Phase (after choosing a job)	phaseId
E	From	From	from
F	To	To	to
G	Pack type	Pack type	packTypeId
H	Date	Date	date
I	Division	Division	division
J	Invoice	Invoice	invoiceId
K	Plan	Plan (after choosing a job)	planId
L	Burden	Burden % (enter 15 for 15%)	burden
M	T&M #	T&M order	tmId

Data entry forms (Access: 4)

ACCESS BUTTON	LETTERS	ACCESS OBJECT	WHERE IN THE WEB APP	NOTES
Process billing	A H I	macro ArProcessBilling	Accounts receivable > Process billing	Lots come from a live query (Access copies them to a temp table first).
Process billing job	A B H I	macro ArProcessBillingJob	Process billing, choose a Job	Same lot rules; a "Packs paid (payroll)" column shows the payroll info the macro appends.
Manual invoice		form ArInvoiceManual	Invoices > Manual invoice	
Manual fix billing code	I J	ArBillCodeFix (manual)	Fix billing code > Manual	Choose a division and invoice, then set stage and work per line.

Action buttons (Access: 3, plus the snapshot box)

ACCESS BUTTON	LETTERS	ACCESS OBJECT	WHERE IN THE WEB APP	NOTES
Post billing	A H I	macro ArPostBilling	Post billing > Post billing	
Clear billing snapshot	A I	macro ArClearBillingSnapshot	Post billing > Clear billing snapshot	In-page confirmation.
Fix billing code	I	macro ArBillCodeFix	Fix billing code tab	Preview first (nothing saved), then confirm; all steps run in one transaction.
Customer snapshot in use (box)		SwitchARsubBillProcess	Shown on Process billing and Post billing	Warns when another user is billing the same builder and division.

Reports (Access: 18)

#	ACCESS BUTTON	LETTERS	ACCESS OBJECT	WHERE IN THE WEB APP	MUST BE CHOSEN FIRST
1	**Invoices by date/div**	E F I	ArInvoiceDateDiv	Reports > Invoices > Invoices by date / division	opens Invoices tab
2	**Inv summary by date/div**	E F I	ArInvoiceDateDivSumm	Reports > Invoices > Invoice summary by date / division	opens Invoice totals
3	**Invoice**	J	ArInvoice	Reports > Invoices > Invoice	pick an invoice, then Print
4	**Pre billing detail**	A I	ArTempBillDetail	Reports > Pre-billing > Pre billing detail	Division
5	**Pre billing summary**	A I	ArTempBillSumm	Reports > Pre-billing > Pre billing summary	Division
6	**Lot-pack to bill**	A E F I	ArLotPackToBill (+ payroll pop-ups)	Reports > To bill > Lot-pack to bill	Division, From, To
7	**Lot-pack by type to bill**	A E F G I	ArLotPackTypeToBill	Reports > To bill > Lot-pack by type to bill	Division, From, To, Pack type
8	**Lots by plan**	A B K	ArLotsByPlan	Reports > To bill > Lots by plan	Job, Plan
9	**Billing by super**	H I	ArBillingBySuper	Reports > To bill > Billing by super	Date, Division
10	**Total billing by lot**	A B C	ArLotBilling	Reports > To bill > Total billing by lot	Lot
11	**T&M (beside Total billing by lot)**	A B C	ArLotBillingTM#	Reports > To bill > Total billing by lot (T&M)	Lot
12	**W I P**	A I L	ArWip	Reports > Work in progress > WIP	Division
13	**Exp**	A I L	extArWip (rptArWip07WipExport)	Reports > Work in progress > WIP export	Division
14	**W I P timed**	A E F I (+ L)	ArWipTimed	Reports > Work in progress > WIP timed	Division, From, To
15	**W I P lot**	A B C L	ArWipLot	Reports > Work in progress > WIP lot	Lot
16	**W I P T&M**	A B M	ArWipTM	Reports > Work in progress > WIP T&M	T&M order
17	**W I P job w/TM ID**	A B I L	ArWipTMJob	Reports > Work in progress > WIP job w/TM ID	Division, Job
18	**Sequence sheet billing data**	A B D	ArCmSequenceSheet	Reports > Other > Sequence sheet billing data	Phase

Known differences from Access

- Burden (L) is entered as a percent in the web app (15 = 15%). Access stores a fraction. W I P timed also takes Burden, because the Access query prompts for it.
- Ratios show blank instead of a #Div/0 error when the denominator is zero.
- Fix billing code changes only lines with exactly one matching stage and work. Ambiguous lines go to the Manual fix. Access picks one arbitrarily.
- The snapshot warning appears only when another user holds the snapshot.
- The payroll pop-ups under Lot-pack to bill open inline under the row instead of in a second window.
- Lots without a plan still appear in the lot reports. Access hides them with an inner join. The local data has none.
- Reports were checked against direct SQL on the sample database. Some (pre-billing snapshot, Fix billing code) have little or no sample data.
