Contract management: Access switchboard → web app

Source: Access form **SwitchCM** ("Contract management"). In the web app open **Contract management** in the left menu. Its tabs are **Overview, Contract Management, Contract values, Revised contract values** and **Reports**. The letters below are the codes Access prints next to each button: they show which filters the button uses. In the web app you pick a report and only the filters it needs appear.

Filters (letters A–L; the Access form has no G or H)

LETTER	ACCESS FILTER	WEB FILTER	API PARAMETER
A	JS customer	JS customer	`jsCustomerId`
B	JS job	JS job (after choosing a JS customer)	`jsJobId`
C	JS lot	JS lot (after choosing a JS job)	`lotId`
D	JS phase	JS phase (after choosing a JS job)	`phaseId`
E	From	From	`from`
F	To	To	`to`
I	PM customer	PM customer	`customerId`
J	PM job	PM job (after choosing a PM customer)	`jobId`
K	PM bid	PM bid (after choosing a PM job)	`contractId`
L	Division	Division	`division`

Data entry forms (Access: 3)

ACCESS BUTTON	LETTERS	ACCESS OBJECT	WHERE IN THE WEB APP	NOTES
Contract values	I J K	form `CmContractVal`	Contract values tab	Plan and pack contract values with their stage/work breakdown. Shows the "check your math" warning when a breakdown does not add up to the pack or plan value (Access forms `CmContractValCheckPack` and `CmContractValCheckPlan`). Also has **Set contract values** and **Refresh**.
Contract management	–	form `CmContract`	Contract Management tab, then open a job	Contracts and addenda of the job, with diary notes and links to estimating bids.
Revised contract values	A B C	form `CmRevContract`	Revised contract values tab	Standard and revised contract values of one scheduled lot, its packs and their breakdown.

Action buttons (Access: 1)

ACCESS BUTTON	LETTERS	ACCESS OBJECT	WHERE IN THE WEB APP	NOTES
Update lot contract values	I J K	macro `CmUpdateContractVal`	Contract values tab → Update lot contract values	Shows how many lots, packs and breakdown values will change, then asks to confirm.

Reports (Access: 20)

#	ACCESS BUTTON	LETTERS	ACCESS OBJECT	WHERE IN THE WEB APP (REPORTS TAB)	CHOOSE FIRST
1	Job history log	I J	`CmJobHistoryLog`	Reports → Job history log	PM customer, PM job
2	Plans w/no contract val	L	`CmNoContractVal`	Reports → Plans w/no contract val	Division
3	Contract latest changes	L	`CmLatestChanges`	Reports → Contract latest changes	Division
4	Contract history	I J	`CmContractHistory`	Reports → Contract history	PM customer, PM job
5	Contract values by plan	I L	`CmContractValueBuilder`	Reports → Contract values by plan	PM customer, Division
6	Contract data by job	I J	`CmContractJob`	Reports → Contract data by job	PM customer, PM job
7	Contracts not executed	–	`CmContractNotExecuted`	Reports → Contracts not executed	nothing
8	Jobs with no contract	–	`CmNoContractJob`	Reports → Jobs with no contract	nothing
9	Bids with no contract	–	`CmNoContractBid`	Reports → Bids with no contract	nothing
10	To do - diary	E F	`CmToDoDiary`	Reports → To do - diary	From, To
11	Plan contract values by pack	I J K	`CmPlanContractVal`	Reports → Plan contract values by pack	PM customer, PM job, PM bid
12	Plan contract values by work	I J K	`CmPlanContractValWork`	Reports → Plan contract values by work	PM customer, PM job, PM bid
13	Option contract values	I J K	`CmOptionContractVal`	Reports → Option contract values	PM customer, PM job, PM bid
14	Option contract values II	I J K	`CmOptionContractVal2`	Reports → Option contract values II	PM customer, PM job, PM bid
15	Option contract values III	I J K	`CmOptionContractVal3`	Reports → Option contract values III	PM customer, PM job, PM bid
16	Sequence sheet - billing data	A B D	`CmSequenceSheet`	Reports → Sequence sheet - billing data	JS customer, JS job, JS phase
17	Packs not contracted $0.01	I	`CmNotContracted`	Reports → Packs not contracted $0.01	PM customer
18	New packs after trued up	L	`CmPacksAfterTruedUp`	Reports → New packs after trued up	Division
19	Options scheduled-lots	A B E F	`CmOptionSelect`	Reports → Options scheduled-lots	JS customer, JS job, From, To
20	Packs not trued up	E F L	`CmPacksNotTruedUp`	Reports → Packs not trued up	Division, From, To

Things to know

- **Same names as Access.** The web screens, report names and filter names are the Access ones, so staff can find each item by the name they know.
- **Contract latest changes** lists the contracts flagged "latest print" and clears those flags when it runs, as in Access. The web app asks to confirm first.
- **Options scheduled-lots** asks you to pick the options first, then lists the lots of the JS job that started between the dates.
- **Job history log** is an Estimating report in Access (button `EsJobLogReport`); the web app offers it here under Contract management.
- **Contracts not executed**, **Jobs with no contract** and **Bids with no contract** take no filters in Access, and none in the web app.
- The report layouts follow the Access queries. They were checked against direct SQL on the sample database; the sample data is thin for a few of them, so some reports show little or no data until real data is loaded.
